Important Information About your Drinking Water

Due to Laboratory Equipment Failure Fendee Estates Monitoring Requirements Not Met for Total Trihalomethanes (TTHMs) and Haloacetic Acids (HAA5)

Fendee Estates is required to monitor your drinking water for specific contaminants on a regular basis. Results of this monitoring are an indicator of whether or not our drinking water meets health standards. Fendee Estates submitted the required samples during the established monitoring period 08/01/2023 to 08/31/2023 but unfortunately due to laboratory equipment failure those samples were not analyzed during the established time frame.

What should I do?

This is not an emergency and there is nothing you need to do at this time; however, as our customer you have a right to know.

TTHMs are a group of byproducts of drinking water disinfection and include: chloroform, bromodichloromethane, bromoform, and dibromochloromethane.

HAA5s are also a group of byproducts of drinking water disinfection and include: monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, and dibromoacetic acid.

What happened? What is being done?

Our water samples for HAA5 and TTHMs were not analyzed during the required time period due to laboratory equipment failure.

Fendee Estates regrets that this error in meeting these requirements occurred. It is recognized that a complete, timely monitoring program is of great value in making certain that safe drinking water is provided to all consumers. Steps have been taken to ensure that monitoring and analysis will be performed on time in the future.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For further information, please contact Fendee Estates at 701-570-8813

THE
MAGAZINE
OF THE
MOUNTAIN

Published by the Mountain Club of America

Volume 10, No. 1, 1911
The Mountain Club of America
1000 North 17th Street, Philadelphia, Pa.

The Mountain Club of America was organized in 1889 for the purpose of promoting the study of the mountains of the United States and of the world. The Club has since that time been engaged in a wide variety of activities, including the publication of this magazine, the holding of field meetings, and the organization of expeditions to the mountains.

The magazine is published quarterly and contains articles on the mountains of the United States and of the world. It also contains news of the Club and of the mountains, and is a valuable source of information for all those who are interested in the mountains.

The magazine is published by the Mountain Club of America, 1000 North 17th Street, Philadelphia, Pa. The subscription price is \$2.00 per annum in advance.

Articles for consideration should be sent to the Editor, Mountain Club of America, 1000 North 17th Street, Philadelphia, Pa. The Editor reserves the right to accept or reject any article for publication.

The Mountain Club of America is a non-profit organization and its funds are derived from the contributions of its members. The Club is indebted to its members for the support which has enabled it to carry on its work.

The Mountain Club of America is a member of the American Association of Economic Geologists, the American Association of Geographers, and the American Association of Professional Geographers.
